Sale Information

SALE AGENTS

Ray White Livestock Dalby

Office: 07 4573 7868

David: 0488 993 931

LOCATION

Dalby Regional Saleyards

72 Yumborra Road, Dalby QLD 4405

PIC: QDDB0051

All visitors, buyers, agents, contractors and transport operators must comply with Dalby Saleyards rules, safety signage, directions and livestock-handling procedures at all times. Please follow all instructions from Ray White Livestock Dalby, saleyards staff and yard personnel.

INSPECTION

Sale cattle will be available for inspection at Dalby Saleyards from 8am on sale day. Please remain within designated public and inspection areas and observe all saleyards safety requirements.

Private inspections prior to sale day can be arranged directly with vendors.

SELLING SYSTEM AND BUYER REGISTRATION

The sale will be conducted as a live auction under ALPA Auction Terms and Conditions.

On-site bidding will operate via a bid card system. All on-site buyers must register before the sale and obtain a bid card prior to bidding.

Phone bidding may be arranged prior to the sale by contacting the agents.

ONLINE BIDDING

Online bidding will be available via AuctionsPlus.

Please familiarise yourself with the AuctionsPlus system before the sale and ensure your buyer registration and bidding access are active. Ray White Livestock Dalby can assist with sale enquiries, however online account approval should be completed directly through AuctionsPlus in advance.

AGENT REBATE

A 5% agent rebate will be paid where all of the following conditions are met:

- The introducing agent has introduced their client to Ray White Livestock Dalby by email prior to the sale;
- The introducing agent attends the sale; and
- The purchaser's account is paid in full within 7 days of the sale.

All rebate claims are subject to the above conditions being met.

Email introductions to: livestock.dalby@raywhite.com

MEALS AND REFRESHMENTS

A canteen will be operating at Dalby Saleyards on sale day, with food and refreshments available.

DELIVERY & DISPATCH

At the completion of the sale, successful purchasers should provide the agents with clear account, delivery and dispatch instructions.

All buyers and carriers must comply with Dalby Saleyards' loading, dispatch and access procedures.

***Free delivery** can be arranged to Roma, Toogoolawah, Warwick, Tamworth or Dubbo saleyards.

***Subsidised delivery** can be negotiated to Emerald, Gracemere and Blackall saleyards.

ACCOMMODATION

If you require accommodation while you are in Dalby, we recommend booking early due to frequent high demand.

Dalby Homestead Motel Phone: 07 4662 5722

Dalby Fairway Motor Inn Phone: 07 4662 2255

Drovers Motor Inn Phone: 07 4669 0444

TERMS & CONDITIONS

ALPA Auction Terms and Conditions apply to the sale. Buyers should familiarise themselves with the applicable terms prior to bidding. A copy can be requested from Ray White Livestock Dalby.

Warrego Water Services provides quality pumping, irrigation and water filtration solutions for agricultural, domestic, commercial and industrial applications.

With experienced local knowledge and access to leading brands, we're here to provide the right solution — from supply and installation through to servicing and repairs.

Daraabah & Goldstar Simmentals Cattleman's Choice Bull Sale

Daraabah was established in 2011 as a family operation, with Goldstar Simmentals established in 2021 and run in conjunction with Daraabah under the management of our son, Lochie McColl.

We have been successfully selling bulls into Queensland since 2017, including into prominent Queensland Simmental studs. As vendors in the Queensland Simmental Bull Sale since its inception, we have built a strong following of repeat buyers - something we believe speaks volumes for the consistency and performance of our cattle.

We're proud to be part of the inaugural Cattleman's Choice Bull Sale, joining like-minded, commercially focused breeders who share one simple goal - to offer good bulls that get out, go to work and make their buyers money.

Daraabah and Goldstar will offer 17 registered Simmental bulls bred with the commercial cattleman firmly in mind. The draft features moderate-framed, easy-calving bulls with strong carcase credentials, alongside some exciting young sires with extra growth, power and performance.

Since June, our sale bulls have been prepared in Queensland near Clifton, allowing them plenty of time to acclimatise ahead of sale day. Importantly, these bulls are not lot fed at any stage. They remain under grazing conditions with grain supplementation right through to sale, maintaining fitness and functionality while preparing them for sale. We believe this preparation gives our bulls the best opportunity to transition quickly and successfully back into full grazing conditions when they arrive at their new home.

These are no-fuss, commercially relevant bulls - structurally sound, bred to perform and backed by genetics that are already proving themselves in Queensland herds.

Whether you're looking to add calving ease, carcase, growth or performance, we believe there's a bull in this draft to suit your program.

Functional cattle. Proven performance. Genetics designed to add value.

ALPINE CHAROLAIS

Welcome to our Charolais bull offering in the inaugural Cattleman's Choice Bull Sale.

History

Alpine Charolais was established 22 years ago by Jane, as a young teen with the guidance of her father Alex, at Sugarloaf Dungog NSW, the sixth generation Tickle family property.

Jane met Justin, a stock and station agent and fellow beef cattle producer, while away at uni. The Sanderson family, Cudgewa Cattle Company now join 500-700 females annually to Alpine Charolais bulls at our properties at Gwabegar and Tottenham, and various agistment properties predominately around Warren NSW.

With a combined passion for the breed, Jane and Justin have built the stud herd together to 100 stud females on their home property between Dubbo and Collie, and lease property towards Narromine NSW.

Justin, a director of their agency, frequently sees the commercial capabilities of the Charolais breed in all conditions throughout Australia. This is proven in the range of areas and conditions Alpine Charolais bulls are sold to, and thriving in. From the heavy Macquarie river flats, to browsing timber at Hungerford and Gwabegar, to Richmond/Croydon forest country, the corner country north of Tibooburra, to the coastal country of NSW. With a focus on correct, free moving cattle with neck extension to reach those extra few leaves, they are paddock proven to handle it all.

The Bulls

Our bulls on offer in the inaugural 2026 Cattleman's Choice Bull Sale represent a selection of 14 Charolais sires from our group of sale bulls this year - 10 fully registered and four herd bulls (by registered bulls, out of ex registered cows) along with two quality Charolais composite sires from the Sanderson family Cudgewa herd.

This year's bulls have been raised and weaned on grass country at our Dubbo and Narromine properties. Although usually only given grass country until yearlings this group has access to an oat and hay based ration at yearling age when dry conditions took hold. In preparation for the sale the group of bulls were moved to a ration at Stephen Hayward's, Allora QLD. Giving access for buyers to view prior to sale, along with acclimatising to QLD conditions.

All bulls have been semen tested for morphology and motility, treated with 7-in-1, three day & tick fever vaccinations (to suit Northern Queensland), drenched and are ready to work.

A supplementary sheet will be available prior to sale day 16 October with the additional data of the bull's weights and scans.

Additionally, our bulls have a warranty period of 6 months from date of sale.

We wish you all the best and thank you for your support.

Justin & Jane Sanderson

Quicksilver has been a standout from a very early age and with his pedigree you can see why! Sired by our own Alpine Beckham 4 E7E (Palgrove Beckham B417E x Alpine Supermodel C2E) and out of powerhouse cow Blaweary Emogene E9E (EC No Doubt) means Quicksilver has softness, grunt, big-volume udders and longevity from every part of his genetics. From his broad muzzle down to his perfect feet, to us this bull offers the complete package with stud and commercially proven genetics backed up by phenotype. With consistently exceptional progeny, Quicksilver features in our herd heavily as a sire over both stud heifers and cows as well as in our ET programs.

We first saw Memphis, a Silverstream Evolution son, at 15 months old on our first trip to New Zealand. Memphis really caught our attention due to his exceptional growth, bone, broad muzzle, soft skin, and perfect feet and structure. Fast forward to now and Memphis has made a huge impact on our herd and has sons and daughters that are producing outstanding stud and commercial progeny that are the top of every drop.

4 Ways Quinton Q58 is a rare blend of homozygous poll, big EMA, red factor and heifer mating suitability. When purchased in 2021 as a 20-month-old for \$32,500 from the 4 Ways bull sale, Quinton boasted a 151cm EMA, demonstrating the power of this moderate framed stud sire in the making. A son of the then record breaking Moongool Lunar Rise, Quinton highlights the great Silverstream Evolution on both sides of his pedigree. Q58's progeny are stamped with his square, stout structure, perfect feet, moderate maturity pattern, bone & clean polled heads.

Traits Observed: GL, BW, 200WT, 400WT, Genomics

Rockstar R3 was born a sire. This kept showing from an early age, weighing in at a whopping 399kg at 200 days on grass in an average season. Packed with power and oozing softness in coat and skin type, Rockstar also boasts impressive bone and outstanding carcass traits. He is broad from his muzzle right back to his pins, just like his sire Silverstream Memphis. The consistency in type of Rockstar is proven by the consistency of not only his progeny but the full embryo siblings to him bred since. Whether females or sires they are always packed with the same quality and performance.

Alpine Rockstar R3E (P) (Pictured at 200 days)

Charbray
Herd Bull

A standout bred from a line of cows that has been classed over and over after each calf to be left with the cream rising to the top. From an exceptionally maternal, high performing cow herd and sired by the clean polled, heavy boned Alpine Romeo. He stands on dark, perfect feet. A sire that glides along the country and is packed with carcase.

BlueStone Beef is based on the philosophy of taking the best in proven science and applying it to our breeding program. We believe well managed hybrid vigour will be the next biggest productivity gain for your beef enterprise.

Using an Angus base, we want to use the best traits of multiple breeds to produce a black, polled animal with superior early growth rates producing a moderate, maternal and highly efficient female. Our sires have longevity, docility, and soundness with moderate mature weights. Our breeding philosophy is uncomplicated and practical.

All BlueStone Beef breeding programs have at least 50% Angus component, enabling all progeny to meet Angus specifications required for marketing purposes. A price premium matched with enhanced growth and reproductive efficiency equals increased profitability.

Heterosis has been shown to be an efficient method to improve fertility, longevity, carcass quality and production efficiency in beef cattle.

Increased production efficiency = increased profitability

By combining breeds that have different strengths we harness the effects of breed complementarity. Reproduction and longevity are most affected by heterosis. Research has shown, due to heterotic effects, composited cows have:

- increased fertility with improvements in calving rates of nearly 4%
- an increase in longevity of 1.36 years
- earlier age at puberty
- Increased yearling scrotal circumference, increased semen production and improved semen quality
- a balance between favourable carcass composition and desirable carcass quality grade at optimum slaughter weights.

BSB

Bankable Genetic\$

At BlueStone Beef we do things differently. The benefit of embracing heterosis to breed composites means we have the unique ability to pivot and specifically tailor breed compositions to meet customer and market requirements. We listen to our clients- and we deliver what they want.

All BlueStone Beef breeding programs have at least 50% Angus component, enabling all progeny to meet Angus specifications required for marketing purposes, yet have the benefits of heterosis for production efficiency. A price premium matched with increased productivity equals increased profitability. Enhanced growth and reproductive efficiency is resulting in increased demand for our seedstock.

We have three breeding programs tailor designed to meet requirements of different customers, regions and markets: BlueStone Benchmark ▪ BlueStone Xtra ▪ BlueStone Bos

- **BlueStone Benchmark**

The BlueStone Benchmark program comprises of a combination of Angus x Black Gelbvieh x Black Simmental genetics. By combining breeds that excel in a different range of traits, we exhibit higher levels of heterosis and harness the effects of breed complementarity. Using a combination of selected traits from multiple breeds, the BlueStone Beef program produces a black, polled animal with superior early growth rates producing a moderate maternal female.

- **BlueStone X-tra**

With the request for “abit extra” we have introduced a line that incorporates Charolais genetics. The ultimate aim of crossing BlueStone Beef x Charolais, is to breed progeny that is black and polled, has extra growth, increased muscle conformation and superior feed conversion efficiency. BlueStone X-tra is ultimately extra performance for our grass-fed clients focussed on terminal programs.

- **BlueStone Bos**

BlueStone Bos is the introduction of Santa Gertrudis and or Brangus genetics to the BlueStone Beef program. The Santa Gertrudis and Brahman genetics will increase adaptability by adding tick resistance, heat resistance, drought tolerance and slick coat. BlueStone Bos will produce black/brown polled sires with between 15-19% Bos Indicus. Bos Indicus x BlueStone Beef composite - that is our point of difference

We believe BlueStone Bos can replicate the BlueStone Beef performance figures achieved to date and in doing so, will:

- increase the fertility of the central and northern Australian herd
- increase productivity through superior average daily weight gains
- enabling access to eastern and southern markets

QUICK GUIDE TO EPD'S

BSB

CE : Calving Ease

BW : Birth Weight

WW : Weaning Weight (160-250 days) - 375,000+ animals recorded annually

YW : Yearling weight (330 – 440 days)

ADG : Average Daily Gain (Post weaning weight gain)

MCE : Maternal Calving Ease (Daughters calving ease as a heifer)

MM : Maternal Milk

MWW : Maternal Weaning Weight (Weaning weight due to growth and milk)

STAY : Stayability (Percent of daughters remaining in the cow herd at 6 years of age)

DOC : Docility

CW : Carcase weight

MB : Marbling (based on actual marbling scores) – 30-35,000 carcass scans per year

BF : Back Fat (Lower ranks higher on the percentile table)

REA : Rib Eye Area

API : All Purpose Index *Note - API is heavily influenced by low birthweight. We are focussed on optimal birthweight- not low birthweight.

TI : Terminal index

All bulls have been independently assessed using Liam Cardile, Accreditation Number: 1033

How to use the Beef Class Structural Assessment System

- A score of **5** is ideal (Note: except for Temperament where a score of 1 is ideal).
- A score of **4** or **6** shows slight variation from ideal, but this indicates most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of **3** or **7** shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand this score indicates greater variation from ideal.
- A score of **2** or **8** are low scoring animals and should be looked at closely before purchasing.
- A score of **1** or **9** should not be catalogued and are considered culls.

All BlueStone Beef cattle are registered with the American Simmental Association and are on the International Genetics Solutions (IGS) database. When comparing EPD's, unlike many single breed societies, we are comparing our data to the IGS Multi Breed EPD Percentile table. The IGS database is the world's largest beef genetic evaluation system. It is a genetic evaluation system that accurately accounts for heterosis and breed differences. With nearly 20 million total animals and more than 340,000 annual registrations, IGS delivers the world's best objectively described, user-friendly, and science based genetic predictions to enhance the profitability of beef cattle producers.

We genetically test all young seedstock through Neogen Australasia. All Bluestone Beef sale bulls have genomically enhanced figures giving more accurate predictions. This data is interpreted in parallel with scanning and structural assessment data. All cattle are independently assessed by Liam Cardile, Eudunda Livestock. Our aim is to have the balance right between phenotype and genotype.

We measure and record weights at all appropriate growth stages. We ultrasound scan to measure for IMF, P8 fat, Rib fat and EMA. Using all these measurements, we select for carcass quality and productivity. Genetic testing allows us to identify homozygous black and homozygous polled. It also allows us to guarantee parentage. All bulls are run in contemporary commercial conditions.

We aim for calving ease and optimum birthweight. We are conscious that continued selection for light birth weights will ultimately reduce the mature sizes and performances of cattle. We breed females who are fertile and structurally designed to give birth easily to an optimal birth weight calf. We target heterosis to fuel maternal efficiency.

We are extremely proud of our figures and how this year's drop has performed.

All Bluestone Beef sale bulls:

- ✓ Have been vet checked for breeding soundness by Coolah Veterinary Clinic
- ✓ Vaccinations are current and include: Ultravac 7 in 1, Pestiguard, Vibrovax, 3-day fever, tick fever and botulism
- ✓ Have been fertility tested by Coolah Veterinary Clinic. They have passed an examination of their reproductive tract. All semen has been morphology tested and reports are available on request.

CLRS Homeland 327H

- Homeland is one of the most impressive and imposing SimAngus bulls you will ever see. He is a 5/8 SM x 3/8 AN, and has been DNA tested homozygous black & homozygous polled
- Clean made, extended, deep sided, powerful, long bodied and well balanced, his phenotype is matched by his impeccable EPD profile, with moderate birth, high performance with breed leading Stayability, Ribeye and Marbling
- First calves are born easy and then show exceptional early growth and muscle expression.
- Homeland comes from a line of females and Top-Grade sired sisters that simply are the prototypes for high producing SimGenetic females. His daughters are being recognized for their excellent udders and strong maternal traits.

KCF Jefferson J911

- Jefferson is a homozygous black & homozygous polled Balancer bull that from Knoll Crest Farm, regarded by many as the #1 source of Gelbvieh & Balancer performance genetics.
- Highest selling bull in the 2022 Knoll Crest Farm bull sale, selling to the highly regarded Warner Beef Genetics program in Nebraska.
- A genuine F6+ bull. His dam has been awarded "Dam of Merit" status twice by the American Gelbvieh Association.
- Excellent structure, docility, and large testicles, and doing ability
- A genuine "curve bender", with moderate BW and strong WW (114% at weaning), YW (120% at yearling), Milk and strong carcass traits.

TMGC Arizona 21H

- TMGC Arizona 21H has been used widely in our program and his progeny were in demand last year.
- The progeny are exciting for performance, body type and foot quality.
- The performance and carcass quality will add traits to many programs.

KCF LCS Enhance R15

- Sired by Sydgen Enhance, LCS Enhance R15 is a great heifer bull option, with super calving ease.
- Plenty of yearling growth, great carcass traits and very docile.
- A long, neat and easy doing, well put together bull.

ABC S769

- Very neat and stylish bull from Hicks Beef, very well put together.
- A maternally focussed bull that will improve the bottom line, another bull bred to breed top end females.
- His data is very impressive: top 1% API, top 1%TI, best 1% birth weight, top 1% maternal calving ease, top 1% marbling and top 1% REA.

Bull

A bull suitable for heifers, with deep maternal backing. His grandsire DLW TPG Glory 5141G- is renowned for producing functional females that get in calf early and hold condition in touch seasons. Impressive weaning weight and carcase weight for a maternal driven bull. A reliable bull for building a durable cow herd.

INTRODUCING A+ BLOODLINES

STAND OUT WITH A STUD VERIFIED A+ BLOODLINES BADGE

When you sell commercial cattle carrying a stud's genetics through AuctionsPlus, the stud can now officially verify and endorse your listing, so the quality genetics you have invested in is visible to every buyer.

- ✓ The verified badge appears prominently on your lot in search results and in catalogues
- ✓ Buyers can search and filter by verified bloodlines to find lots carrying those genetics
- ✓ The stud can now share and amplify your listing directly to their buyer network

How it works

1

Request is automatic

When your agent lists your cattle on AuctionsPlus and claims a bloodline, a verification request is automatically sent to the stud

2

The stud reviews and verify

They confirm the genetics and approve the listing, giving your lot the official verified endorsement

3

Your listing goes live with the badge

The stud verified badge automatically appears on your lot
